

## Design Assistant

Aquarium Architecture specialises in the design, installation, and ongoing maintenance of custom made aquariums.

### Job Description:

Aquarium Architecture is in search of an experienced designer with an eye for detail to assist in the bespoke design of residential and commercial aquariums. It is important for candidates to be skilled in drawing by hand as well as through the use of digital design software. Candidates will also be responsible for collaborating with individuals within in the firm, as well as outside of the firm, to plan, design, and install aquaria.

### Responsibilities:

- Produce detailed technical designs of new projects using AutoCAD
- Work closely with both the Creative Director and the Operations Director during the planning and installation process
- Act as liaison between the firm and clients
- Travel to client locations during the initial consultation to determine the parameters of the project
- Work collaboratively with contractors on the design and installation of aquariums
- Assist installation engineers in the aesthetic design of aquarium interiors
- Work with the marketing team on the updating and design of the company website
- Assist office staff with daily operations

### Desired Skills and Experience:

- Architecture/interior design graduate preferred
- Must have a sound knowledge of aquatic systems
- 1+ years working in the design industry
- Experience creating technical drawings
- Skilled in AutoCAD, Adobe Photoshop, Adobe InDesign, and Google SketchUp
- High level drawing skills
- Driving license

### Salary:

£20,000 - £35,000
