

## Field Engineer

### Company Profile:

Aquarium Architecture specialises in the design, installation, and ongoing maintenance of custom made aquariums.

### Job Description:

Aquarium Architecture is in search of a knowledgeable Field Engineer to manage and maintain commercial and residential aquariums. This includes ensuring that tanks are clean, mechanical systems are functioning properly, completing needed repairs, and travelling to client locations on a motorcycle. Candidates will also be responsible for the transfer and care of aquatic livestock.

### Responsibilities:

- Serve as a Field Engineer for various aquatic environments, aquarium sizes, and clients
- Clean and maintain fish aquariums, which includes performing water testing, medicating tanks, removing dead fish, feeding fish, and delivering products to the customer for their use
- Ensure that mechanical systems, filtration systems, and lighting are operating correctly
- Safe transportation, delivery, and introduction of livestock
- Create displays that are aesthetically pleasing, as well as good for the creatures and plants within the aquarium
- Able to work 'on call', as determined by the management

### Desired Skills and Experience:

- Degree in biology or a related science preferred
- Basic knowledge of salt and fresh water aquatic life and maintenance
- Excellent time management skills
- Ability to learn and utilise proper cleaning techniques
- Basic mechanical ability
- Ability to travel to client locations
- Driving license

### Salary

£18,000 - £32,000 + Bonus
