

## Installation Engineer

Aquarium Architecture specialises in the design, installation, and ongoing maintenance of custom made aquariums.

### Job Description:

Aquarium Architecture is in search of an engineer to assist in the comprehensive onsite installations of residential and commercial aquariums. Training will be provided, however candidates must have a basic knowledge of electric, plumbing, and water systems. Highly motivated persons with a 'get up and go' attitude will be considered. Candidates with the right attitude preferred to those with experience.

### Responsibilities:

- Coordinate and perform tasks involved with new aquarium installations, moves, disassembly of aquariums, equipment repair and replacement
- Act as liaison between the firm and contractors regarding commission scheduling
- Communicate with clients and contractors
- Carry out occasional aquarium maintenance
- Deliver items to site
- Responsible for selecting livestock for clients
- Drive to customer locations around London on a motorcycle

### Desired Skills and Experience:

- Previous experience working in a labour environment
- Required experience in aquaria/plumbing, whether professional or personal
- Knowledge of electric, plumbing, and water systems
- Able to work alone as required
- Important to possess a 'get up and go' attitude
- Driving license

### Salary:

£18,000 - £32,000 + Bonus
